

NTC Map Instructions:

- 1) Copy Contract_Map directory from CD to Drive C:; you will end up with the pathname C:\Contract_Map.
- 2) Install ArcExplorer 4.0.1:
 - a) **System Requirements**
 - i) Operating System: Windows 98/2000/NT/XP for Intel, Service Pack 4, 5, or 6a (6a is recommended)
 - ii) Disk Space: 13 MB
 - iii) JRE: 1.3.1_02 or 1.4.0 with Java Plug-in.
 - iv) ArcExplorer 4.0.1 requires JRE 1.3.1_02 or 1.4.0. If you don't have either of these, the installation file has both the required JRE and the ArcExplorer setup program (**note that you must run the JRE prior to launching ArcExplorer 4.0.1**).
 - b) **Installing ArcExplorer 4.0.1 for Windows**

To begin installation, navigate to AE4JavaSetup.exe in the directory where you downloaded it from the Web.

 - i) Double-click the AE4JavaSetup.exe and follow the on-screen instructions.
 - ii) After installation, click Start | Programs | ArcGIS | ArcExplorer 4.0.1 to open ArcExplorer 4.0.1.
 - iii) Installation of ArcExplorer 4.0.1 on Windows requires **administrator privileges**.
 - iv) During the installation, files are put in the %TEMP% directory for utility purposes. A %TEMP% variable must be set and the %TEMP% directory should be **writable**.
- 3) Open ArcExplorer 4.0.1 and maximize the window by clicking once on the maximize button in the top right corner of the window.
- 4) Open the ATI_Map project file. When it loads you will see three layers on the left-hand side: ATI_Grids_Info, ntc_grids, and Contract Project Map. Each grid is labeled with the appropriate grid number.
- 5) To view grid activity information, click on the ATI_Grids_Info layer, then choose the “information” tool (it looks like a black circle with a white lower-case “i” in the middle); using that tool, click in a grid number. A window will open up, giving you a variety of information concerning that grid. At the top you will see the grid number you’ve selected.
